PROJECT- INDUSTRIAL ANOMALY DETECTION

Academic project

📍 Location

To address the growing threats to critical infrastructure, I developed an anomaly detection dataset for industrial control systems

- What was a successful outcome of your work? (e.g. Raised \$3,000 for the charity)

Industry collaboration

📍 Location

To bridge the gap between academia and industry, as my final year project, developed a real-world dataset for anomaly detection.

- What was a successful outcome of your work? (e.g. Raised \$3,000 for the charity)

EXPERIENCE

Hardware Assembler

CMRL(Chennai Metro Rail Limited)

📅 08/2024 - 09/2024 📍 Chennai, India

AFC (Automatic Fare Collection) Department

- Gained experience in system integration, hardware-software coordination, and managing public-facing technology solutions.

Biometric Test and Analysis

Precision Groups

📅 09/2024 - 10/2024

- Gained expertise in biometric technologies, data analysis, and quality assurance.

SUMMARY

Dedicated software engineering graduate with a strong technical foundation and a passion for problem-solving. Proven ability to apply theoretical knowledge to practical solutions. Seeking a challenging role to contribute to innovative software development projects.
